

SWASTIK DUTTA

Aspiring Software Developer | MERN Stack Developer

dswastik104@gmail.com | +91 9073040706 | Kolkata, India | [linkedin.com/in/swastik-dutta-3b8aa8264](https://www.linkedin.com/in/swastik-dutta-3b8aa8264)

CAREER OBJECTIVE

Detail-oriented B.Tech Information Technology graduate with a strong foundation in the MERN stack, Data Structures & Algorithms, and System Design. Proven ability to design and deploy scalable, full-stack web applications with secure authentication and efficient data management. Seeking a Software Developer role to deliver robust engineering solutions while continuing to build expertise in AI, Generative AI, and LLM technologies.

TECHNICAL SKILLS

Core: Data Structures & Algorithms, System Design, REST APIs
Languages: Java, Python, C, JavaScript, HTML, CSS
Frameworks & Libraries: React, Redux, Node.js, Express.js, Tailwind CSS
Database & Tools: MongoDB, Git, GitHub, JWT Authentication
Other: System Design, Generative AI Tools, Problem Solving, Effective Communication

PROJECTS

YouTube-Inspired Video Streaming Platform Aug 2026
Built a full-featured YouTube clone using the MERN stack with secure JWT-based user authentication and session management. Developed a video management system supporting uploads with titles, descriptions, and thumbnails, alongside a seamless playback experience. Implemented engagement features including likes, comments, and shares, a channel subscription system, video search, and a personalized recommendation engine to improve content discovery.

ShoppYGlobe — Full-Stack E-Commerce Application Jun 2026 - Aug 2026
Designed and developed a fully operational e-commerce platform end-to-end using the MERN stack. Built a responsive front end with React and React Router for smooth navigation, using Redux for efficient cart and state management. Engineered a Node.js/Express.js backend with RESTful API endpoints for product listing, user registration, authentication, and cart management, backed by MongoDB for reliable data storage. Implemented JWT-based token authentication to secure user sessions and optimized the application for performance and cross-device responsiveness.

Weather Forecast Application Mar 2026 - Apr 2026
Developed a responsive weather forecasting application that retrieves real-time conditions and multi-day forecasts for user-specified locations. Implemented asynchronous API requests to fetch live weather data and dynamically update the DOM, ensuring fast, accurate, and interactive results. Focused on clean UI/UX design and cross-device accessibility using JavaScript for efficient data handling.

EDUCATION

B.Tech, Information Technology — Government College of Engineering and Textile Technology	2022 - 2026
CGPA: 7.69 / 10	
Senior Secondary (XII), W.B.C.H.S.E — Kanchrapara Harnett High School	2022
Percentage: 81.00%	
Secondary (X), W.B.B.S.E — Kanchrapara Harnett High School	2020
Percentage: 82.14%	

CERTIFICATIONS

Full Stack Development — Internshala (Virtual) Feb 2026 - Aug 2026

- HTML, CSS, JavaScript, Git & GitHub, Data Structures & Algorithms, React, Node.js, Express.js, MongoDB

EXTRA-CURRICULAR ACTIVITIES

- Participated in an inter-college coding competition, demonstrating problem-solving, logical thinking, and effective collaboration under time constraints to solve algorithmic challenges.
